About Honeycomb Racing

An F1 in Schools Professional class team from James Gillespies High School in Edinburgh, we value sustainability, innovation, and co-operation above all else. Our five members work seamlessly together, bringing together a variety of skills which give us the breadth of skills necessary for success. We also have a big online following, with a rapidly growing Instagram page, and a TikTok account with over 100,000 views.

October 2022

Regional Success

At the Scottish Regional Finals this year, we came in first of all of the professional teams. We also:

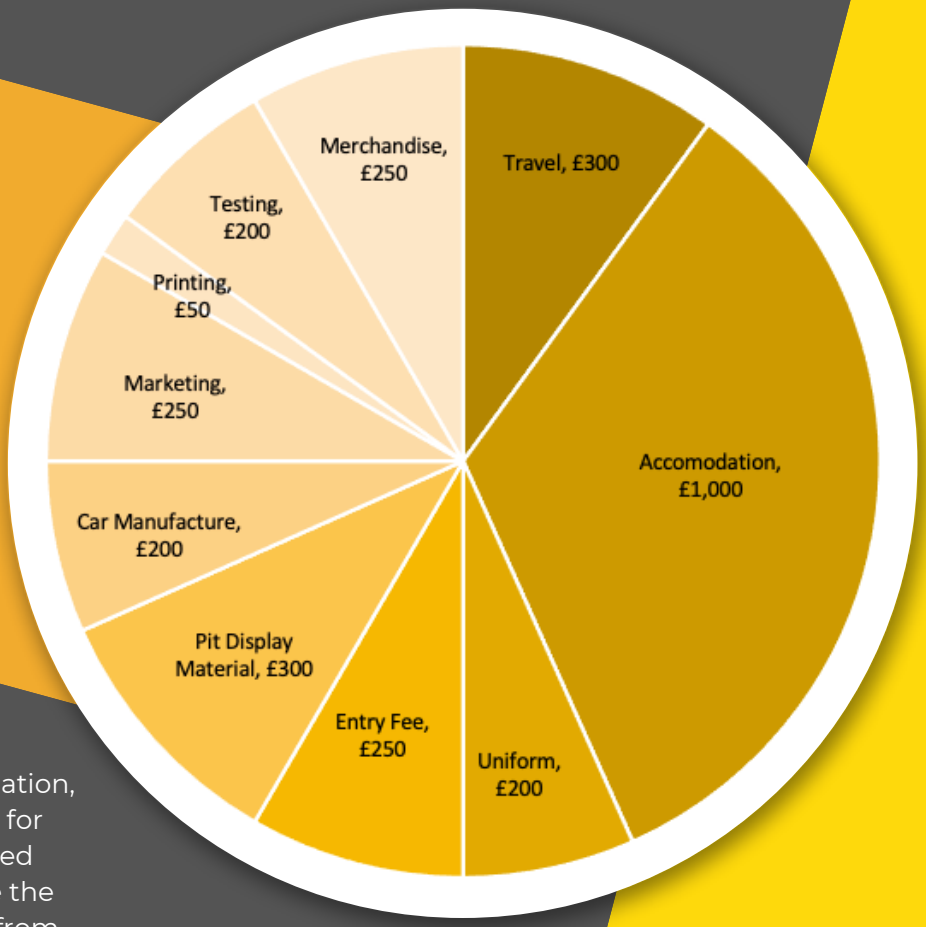
- Received the "fastest car" award.
- Received the "best engineered car" award.
- Were shortlisted for the "sponsorship and marketing" award.

January 2023

National Championship

Next January, we will be competing in the UK National Finals, where we aim to win a place on the podium. This will take us to the World Championships, which are set to take place next Summer.

Why Sponsor Us?



We view sponsorship not as a donation, but as a relationship with benefits for both sides. As such, we have created tiers of sponsorship, which outline the perks that your company will get from us when you sponsor us. These tiers increase with the money we receive, and can be found on the next page. For any companies wishing to supply us with goods or services, we are happy to discuss an appropriate tier to be considered at.

We also care about having an ongoing relationship with our sponsors, and so will be sending out a newsletter at the end of each month to update you on our progress.

At our current point, we're competing at a national level, but should we make it to worlds, that stage will turn international, bringing a big spotlight to all of our sponsors.
